Jos, Nigeria · Remote-Ready

PROFESSIONAL SUMMARY

Full-Stack Web Developer and Software Engineer with 5+ years of hands-on experience building and deploying production-grade web applications using Python, Django, and JavaScript. Founded Techmiary Coding Academy, training 200+ students in software engineering fundamentals. Developed and launched wdasms.cloud and 10+ client platforms including exam portals, student management systems, and data dashboards. Delivered end-to-end software solutions for 20+ university final-year projects. Restored a fully non-functional computer laboratory at White Diamonds Academy from zero — re-networking, reinstalling, and upgrading all systems to an advanced operational standard. Adept at remote collaboration, technical leadership, and translating complex requirements into clean, maintainable code. Open to remote-first engineering roles in Nigeria, Europe, and North America.

TECHNICAL SKILLS

Languages	Python 3, JavaScript (ES6+), HTML5, CSS3, SQL
Frameworks	Django, Django REST Framework, Bootstrap 5, jQuery, React (Hooks)
APIs & Backend	RESTful API Design, JSON, Authentication (JWT, Session), CRUD Architecture
Databases	MySQL, SQLite, Database Design, Query Optimization, Data Modeling
DevOps & Tools	Git, GitHub, Linux/Ubuntu, Bash/CLI, PythonAnywhere, Cloud Deployment, RDP
IT Infrastructure	Network Setup & Troubleshooting, OS Installation, Hardware Configuration, Lab Management
Education & PM	Curriculum Design, Technical Instruction, Project Management, Agile Workflow
Soft Skills	Remote Collaboration, Technical Leadership, Problem-Solving, Mentoring, Communication

PROFESSIONAL EXPERIENCE

ICT Instructor & Computer Lab Administrator

White Diamonds Academy

Sept 2025 – Present

Jos, Plateau State, Nigeria

- Inherited a fully non-functional computer laboratory with zero operational machines; independently diagnosed all hardware and software faults, repaired and reconnected every unit, and restored the lab to full working status within the first weeks of joining.
- Installed and configured operating systems, networking infrastructure, security software, and educational applications across all lab computers — transforming a dead facility into a modern, fully equipped ICT learning environment.
- Upgraded lab resources to an advanced standard by deploying productivity suites, coding tools, and internet access, raising the quality of digital education available to 100+ enrolled students.
- Design and deliver structured ICT lessons covering computer fundamentals, Microsoft Office, internet literacy, and introductory programming to multiple year groups.
- Provide ongoing preventive maintenance and first-line technical support for all school computer systems, maintaining 99%+ lab uptime.

Founder & Lead Software Engineer

Techmiary Coding Academy / Techmiary Institute of Technology

2023 – Present

Nigeria (Remote & On-Site)

- Founded and scaled a software engineering training institution from the ground up, growing enrollment to 200+ students across cohorts covering Python, Django, JavaScript, HTML/CSS, and software engineering principles.

- ▶ Architected and deployed **wdasms.cloud** — a live production platform built on Django with REST APIs, cloud hosting, secure authentication, and dynamic content management, serving real end users.
- ▶ Engineered end-to-end web applications for 20+ university final-year students, delivering complete solutions from requirements analysis and system design through development, testing, and deployment.
- ▶ Built and maintained 10+ production-grade platforms including student management systems, online examination portals, registration portals, and automated reporting dashboards used in live academic environments.
- ▶ Managed full project lifecycle: API integration, authentication architecture, database design, UI implementation, debugging, and cloud deployment across all client engagements.

Full-Stack Web Developer (Contract)

2021 – 2023

Various Clients & Organizations

Nigeria

- ▶ Designed, developed, and delivered 15+ custom websites and web applications for small businesses, schools, and SMEs across Nigeria.
- ▶ Built feature-complete admin dashboards with role-based authentication, CRUD operations, dynamic content management, and data reporting.
- ▶ Migrated 5+ legacy systems to modern Django/Python frameworks, improving application performance, security posture, and long-term maintainability.
- ▶ Integrated REST APIs, payment gateways, third-party services, and automated backend workflows across multiple client projects, reducing manual administrative workload significantly.

Computer Science Teacher & ICT Instructor

2019 – 2023

Moniola Laurel Educational School · Iroko Institute of IT · Royal Kiddiss Academy · FGC Kiyawa (NYSC)

Nigeria

- ▶ Designed and delivered ICT and programming curricula to 300+ students across four institutions, covering Python, web development, Microsoft Office, and computer fundamentals.
- ▶ Supervised hands-on coding labs and student projects; mentored learners from zero coding experience to building functional applications.
- ▶ Completed National Youth Service Corps (NYSC) as an ICT Teacher at FGC Kiyawa, earning ICT & System Administration certification.
- ▶ Built and deployed automation tools to digitize school administrative processes, reducing paperwork and manual reporting time.

KEY PROJECTS

wdasms.cloud *Python · Django · REST API · MySQL · Cloud Deployment*

Role: Sole architect and developer — designed system architecture, built all backend APIs, implemented authentication, and deployed to live domain.

Impact: Production platform actively serving users; demonstrates end-to-end ownership of a real-world Django application from concept to cloud.

Online Examination & Assessment System *Python · Django · MySQL · Bootstrap · JavaScript*

Role: Full-stack developer — built exam creation engine, automated grading logic, student analytics dashboard, and role-based admin panel.

Impact: Reduced manual exam marking to zero; enabled instant result generation and performance tracking for academic institutions.

Student Management System *Python · Django · Bootstrap · MySQL · REST API*

Role: Lead developer — architected enrollment workflow, results processing engine, staff portal, and automated PDF report generation.

Impact: Replaced manual student records system; deployed in live academic environment managing enrollment and result data for hundreds of students.

University Final Year Project Suite (20+ Projects) *Python · Django · JavaScript · REST APIs · MySQL*

Role: Technical lead and developer — delivered requirements analysis, system design, development, and deployment for each client.

Impact: Enabled 20+ students to successfully submit and defend functional, production-quality software projects; 100% client delivery rate.

School Website & Data Analytics Dashboard *Django · JavaScript · Bootstrap · Chart.js*

Role: Full-stack developer — built institutional website, live data dashboards, announcements system, and student/staff information portal.

Impact: Gave school administration real-time visibility into key metrics; replaced static HTML site with a fully dynamic, maintainable platform.

EDUCATION & CERTIFICATIONS

Education

B.Sc. Computer Science

Prince Abubakar Audu University, Kogi State

Graduated: 2023

Certifications & Achievements

✓ ICT & System Administration — NYSC (2022)

✓ Kaggle Python Developer Badge

✓ Founder & Director — Techmiary Institute of Technology

ADDITIONAL INFORMATION

- ▶ Remote Infrastructure: proficient with Git/GitHub, Linux CLI, cloud deployment, async documentation, and remote collaboration workflows.
- ▶ Time Zone Flexibility: available to work GMT, CET, and EST business hours; experienced with asynchronous client communication.
- ▶ Entrepreneurial Track Record: founded two tech institutions, grew student base to 200+, and operated self-funded from inception.
- ▶ Community Impact: training the next generation of software engineers in underserved communities across North-Central Nigeria.
- ▶ Languages: English (Professional Fluency — written and spoken).
